

Storage / Trundle Platform Bed

5149: PN-FU-XB-ES

Congratulations on the purchase of your Storage/Trundle Platform Bed. It has been crafted to the highest standards of quality and safety and will give you many years of enjoyment and practical use.

Since this is a natural wood product, there will be variations in color and grain and minor checking may occur. This is normal and does not compromise the integrity of your bed. In fact, variation in character of natural wood is integral to the beauty and appeal of hardwood furniture and distinguishes it from prefabricated, synthetic and composite materials.

On this insert you will find a list of the hardware and parts included as well as detailed assembly instructions. Assembly is quite simple and requires only a flat head screwdriver and a Phillips head screwdriver. The use of a power drill with Phillips head attachment is helpful but not necessary. Assembly will be most easily accomplished if you take the time to carefully sort the hardware and familiarize yourself with the function of each piece.

If you need assistance with assembly, part replacement or any other matter, please contact the toll-free Epoch Design Customer Service Team from Monday through Friday, 9 AM-6PM PST at 1 (800) 589-7990. You may also email your request or comments to info@epochbydesign.com and a customer service representative will respond.

Thank you and Enjoy

HARDWARE

48 **30mm wood screws**
Used to attach slat & plank braces 

98 **20mm wood screws**
Used to attach wheels, bottom planks (long) & bottom panels (short) 

4 **15mm wood screws**
Used to attach center support 

16 **35mm bolts**
Used to connect the front & back panels 

4 **Wooden dowels**
Used to connect the front & back panels 

6 **Wire retainers**
Used to divide storages 

9 **Wheels** 

1 **Hex key**
Used to tighten bolts 

PARTS

1 **Headboard**

1 **Footboard**

2 **Front panels**
For trundle & storage drawer

1 **Back panel**
For trundle

1 **Back panel**
Fo storage drawer

2 **Side rails**

1 **Center support**

1 **Slat bundle**

2 **Bottom Planks for left & right**
For trundle

1 **Bottom Plank for center**
For trundle

2 **Bottom Planks**
Fo storage drawer

2 **Trundle end bed panels - long**
For trundle

1 **Divider - long**
For trundle

2 **Plank braces - long**
For trundle

1 **Middle Plank brace - long**
For trundle

2 **Trundle end bed panels - short**
For storage drawer

2 **Dividers - short**
For storage drawer

2 **Plank braces - short**
For storage drawer

1 **Middle Plank brace - short**
For storage drawer

- 1) Slide one rail into the grooves of the headboard **(A)**. Make sure the slat rail is facing the inside of the bed. Repeat this process with the other side rail. Next do the same with the other end of the rails into the footboard **(B)**. Then tap the top of the rail ends gently with a rubber mallet to make sure the connections are secure.

Handy hint: If bedrail hook bracket does not drop fully down into the head/footboard bracket, adjust the hook bracket on the bedrail end by loosening the three screws one half turn each.

- 2) Put the center support into the center support brackets. Secure the center support with 15mm wood screws **(C)**.

- 3) Spread the slat bundle **strap side down** evenly. Attach the slats with 30mm wood screws. First secure one slat on one end and then one slat on the other end evenly. Then use the remaining wood screws to secure all slats to the slat rails and center support with a Phillips Head screwdriver **(D)**. A power screwdriver with the clutch set on low is useful here.

- 4) Attach end panels (long) to the front and back panels with wooden dowels. Use 35mm bolts to tighten the end panels (long) with the front and back panel (E).
Note: Do not tighten any of these bolts until all of them are threaded part of the way.

- 5) Attach the plank braces (long) and middle plank brace (long) to the trundle with 30mm wood screws (F).

- 6) Lay the bottom planks into the trundle. The top side of the planks will have countersunk holes for the 20mm wood screws (G).
Note: Put the bottom planks for left & right in first and slide them into place. Then put the bottom plank for center in.

- 7) Carefully flip trundle over and attach the wheels with 20mm wood screws (H).
Note: This step should be done on a soft surface such as carpet or blanket to prevent scratching on your trundle.

OPTIONAL STORAGE

- 8) To use the bottom bed as a storage drawer, simply remove the mattress and insert the wire retainers and then slide the drawer divider into the wire retainers down the grooves on the divider (I).

- 9) Attach end panels (short) to the front and back panels with wooden dowels. Use 35mm bolts to tighten the end panels (short) with the front and back panel (J).
Note: Do not tighten any of these bolts until all of them are threaded part of the way.

- 10) Attach the plank braces (short) and middle plank brace (short) to the trundle with 30mm wood screws (K).

- 11) Lay the bottom planks into the storage drawer. The top side of the planks will have countersunk holes for the 20mm wood screws (L).

- 12) Carefully flip storage drawer over and attach the wheels with 20mm wood screws (M).
Note: This step should be done on a soft surface such as carpet or blanket to prevent scratching on your storage drawer.

OPTIONAL STORAGE

- 13) To use the storage drawer, simply add the wire retainers and the dividers (short) as you wish in order to achieve your desired storage area (N).
