

# VERONA PLATFORM BED

5415: VA-KI-PB-SN, 5416: VA-QU-PB-SN,  
5417: VA-FU-PB-SN

Congratulations on the purchase of your Verona Platform Bed. This bed has been crafted to the highest standards of quality and safety and will give you many years of enjoyment and practical use.

On this insert you will find a list of the hardware and platform bed parts as well as detailed assembly instructions. Assembly is quite simple and requires only a Phillips head screwdriver. The use of a power drill with Phillips head attachment is helpful but not necessary. Assembly will be most easily accomplished if you take the time to carefully sort the hardware and familiarize yourself with the function of each piece.

If you need assistance with assembly, part replacement or any other matter, please contact the toll-free Epoch Design Customer Service Team from Monday through Friday, 9 AM-5 PM PST at 1 (800) 589-7990. You may also email your request or comments to [info@epochbydesign.com](mailto:info@epochbydesign.com) and a customer service representative will respond.

Thank you and Enjoy

## HARDWARE LIST

**30 mm slat screws**  
Used to secure  
slats to rails

**36x FULL 39x QUEEN**  
**52x KING**

1x Footboard

### KING

1x Headboard

2x Center Support Rail

1x Footboard

HAVE QUESTIONS OR CONCERNS? CALL US FIRST: 1-800-589-7990

1

Make sure the platform for slat attachment is facing the inside of the bed. Then slide one side rail into the slots of the headboard. Repeat this process with the other side rail.

Next do the same with the other end of the side rails into the footboard.

Gently tap the top of the rail ends with a rubber mallet to make sure the connections are secure.

2

Attach the center support rail(s) to the center support brackets using the 15mm wood screws.

Full / Queen

King

3

Spread the slat bundle, strap side down, evenly across the side rails. Then use a Phillips head screwdriver and the 30mm wood screws to secure the first slat on one end of the bed and the last slat other end. Finally, screw the remaining slats to the platform. \*A power drill set to low torque with a Phillips head extender may be useful in this step.
